

DECLARATION OF ENVIRONMENT & SUSTAINABILITY

Our goal is to provide quality service and high-performance products so that we support optimal conditions for a safer working environment to our customers. Ejendals strives to ensure that we act in a sustainable, responsible manner where we can participate and influence. Our actions are based on the latest research and technologies available.

For Ejendals Environment & Sustainability are highly prioritized. And out of respect and customer focus we have developed exact definitions so that we all can come together. Ejendals have decided to focus on 5 out of 17 UN Sustainable Development Goals.

INNOVATION

In Product development we continuously aim at improving environmental & sustainable aspects.

- Sustainable material solutions
- Design for manufacturing
- Full product/manufacturing ownership
- Fine tuned production measures to save waste and material usage
- Strengthen Lifecycle of products
- Repair operations (customer claims)
- Product related certificates

Environment & Sustainability is part of development process as a gateway check point.

TRANSPORT

The logistics chain is continuously optimized. Our goals are to reduce the amount of air transport in favor of goods transported by boat. Railway is preferred before truck and road when possible.

Targets 2021:
 Delivery performance SOT >97% (2020: 96%)
 Air transport <0.2% (2020: 0.2%)

CO₂

We have begun monitoring CO₂ emissions, aiming at reducing our environmental footprint wherever suitable green alternatives appear.

Target 2021: We will continue to work with our transport providers on improving the methods of CO₂ data collection.

PACKAGING

In collaboration with our customers, we are working to increase the use of renewable raw materials in our packaging and to reduce the amount of petroleum based packaging materials.

HEALTH & SAFETY

Ejendals carries out risk assessments both on a continuous basis and upon changes.

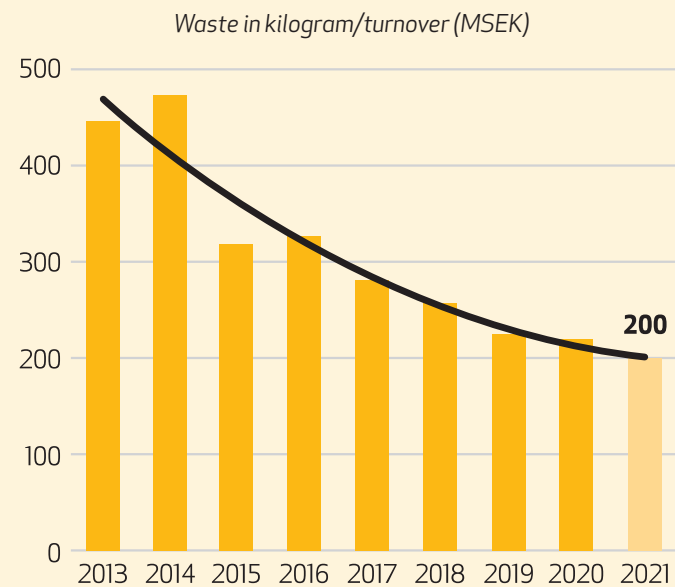

However proud we are of our competent and knowledgeable employees, knowledge is often a fresh item that needs to be maintained/refreshed.

Targets 2021:
 95% Occupational H&S risk assessments done.
 95% of all employees trained within Code of Conduct.

WASTE MANAGEMENT

To reduce the amount of used resources Ejendals develop all our products and processes with waste minimization in mind.

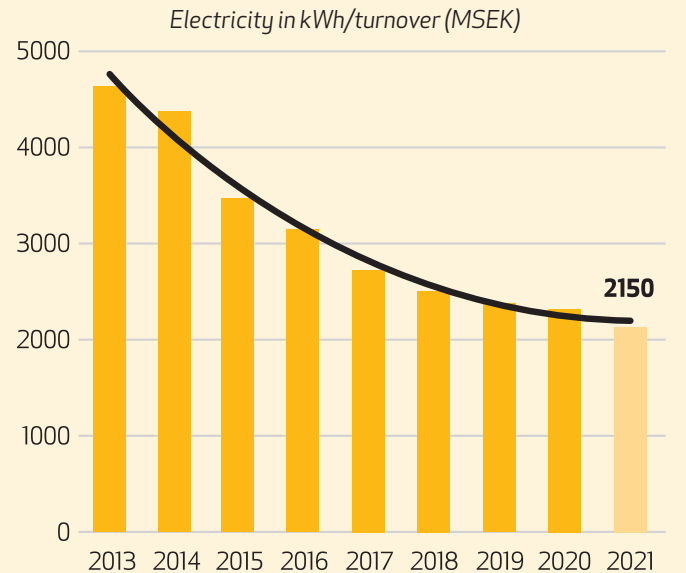

Target 2021:
 Total waste <200 kg / MSEK

ENERGY

Ejendals encourage the long-term ambition of our subsuppliers to reduce energy use and the proportion of fossil fuels to limit greenhouse gas emissions.

Target 2021:
 Electricity <2150 kWh / MSEK

CERTIFICATES

Ejendals AB & OY have Certificates for ISO 9001:2015, 14001:2015, 45001:2018.

Sustainability Rating: Received a Silver Medal from EcoVadis 2021.

Product certificate EU Ecolabel for Safety shoes.

Product certificate OEKO-TEX® for Safety gloves.
