## Ejendals introduces **TEGERA® Infinity™** – a new collection of safety gloves based on proprietary dipping technology.

*Company encourages users to experience the “Infinity feel” – an exclusive level of unlimited fingertip precision, grip, softness, dexterity and protection in a new generation of safety gloves.*

*Try on your second skin! The new generation of **TEGERA® Infinity™** safety gloves feels like having a “second skin” but with just the right level of protection.*

Ejendals AB in Leksand, Sweden, is now introducing its new **TEGERA® Infinity™** collection of ultra-comfortable coated safety gloves. Based on proprietary new manufacturing technologies, these next-generation gloves offer a new level of superb grip, dexterity, softness and, of course, excellent protection. The glove’s heightened sensitivity, which the company is calling the “Infinity feel”, is enabled thanks to a unique manufacturing process that combines state-of-the-art coating material with extra-soft and protective fibers. It’s a matter of getting the knit, dip and yarn working together to offer a sensational level of smooth fingertip control.

**TEGERA® Infinity™** gloves are produced using a unique blend of nitrile and water-based PU, which provides excellent flexibility,

uncompromising protection and a superb fit. Nitrile is a synthetic latex-free rubber that offers a high level of sensitivity. Together with water-based PU, users can rest assured that no harmful solvents are present (DMF-free).

### Meeting global safety standards

Since 1949, **TEGERA®** products from **Ejendals** have been designed and developed in Leksand in an ongoing product development program that includes a wide range of rigorous testing and adheres to the global **OEKO-TEX®** standard to ensure the highest level of safety.

“We are very proud of launching the new **TEGERA® Infinity™** safety glove range,” says Göran Ström, Product Manager, Ejendals AB. “Imagine a safety glove so snug, comfortable and sensitive it doesn’t even feel like you’re wearing a glove at all.”

### A solution for every need

The **two “single-dip” gloves** are ideal for dry to semi-dry conditions that demand a high degree of dexterity, tactility and control. The **three “double dip” models** were developed specifically to prevent slippage in oily or wet surfaces. And, finally, **two CUT5 cut-resistant gloves** make use of the company’s own proprietary cut-resistant fiber (CRF) material for added protection against sharp objects. In short, a complete range of solutions for demanding professionals.

## “Like wearing a second skin”

“Our ambition was to create a new collection that would almost give users the feeling of having a second skin to boost their productivity,” says Göran Ström, who adds that customers who have tried the gloves in blind tests are extremely positive. They describe the new **TEGERA® Infinity™** models as “Fantastically smooth”, “Incredibly flexible considering the high level of cut protection” and “Amazing dexterity in the fingers - these gloves are going to be hugely popular.”

*Precision at your fingertips: The ultra-close fit of TEGERA® Infinity™ safety gloves combines soft comfort with an unusually high level of dexterity.*

## Having an Infinity™ experience

According to Ström, the new safety gloves are really in a class of their own, but it's not so easy to see the difference just by looking at them. “You really need to try them on to experience the ‘Infinity feel.’ This is when customers have that ah-ha reaction.”

Jan Lundmark, Global Sales & Marketing Director, **Ejendals AB** says: “Ejendals works together in long-term partnership with end-users to jointly develop new products and services. This is part of the Ejendals DNA and has always been a key to finding new innovative solutions.”

The **TEGERA™ Infinity™** collection includes:

- **TEGERA® INFINITY™ SINGLE DIPPED 15GG:** Ultra-thin gloves for precision work in dry to semi dry conditions. TEGERA® 8800/8801
- **TEGERA® INFINITY™ DOUBLE DIPPED 18GG:** For wet and oily work conditions where grip is the key. TEGERA® 8802/8803/8804
- **TEGERA® INFINITY™ CRF® CUT 5:** For extra cut protection against sharp objects. TEGERA® 8807/8808
